

Recycling Initiatives

Happy New Year!

As goes the saying- New Year, New Custom Essence Sustainability! In 2019, we are trying to reduce our resource consumption wherever there is room for improvement.

We have outfitted all our break rooms with reusable mugs to use, in place of the previously used foam cups (thank you Malini for ordering!) Our goal is to eventually reduce our foam/plastic cup utilization by 100%!

Additional recycling stations have been strategically placed around our Custom Essence facility for better accessibility.

Kevin S. has also arranged plastic bag recycling bins in three of our on-site break rooms. Any plastic shopping bags at CE that need to be recycled can be placed in the appropriately labeled bin for drop-off.

Stay tuned to see what we'll be up to next on Custom Essence's sustainability journey!
